Independent accountants' review report on the condensed consolidated interim financial information

To
The Board of Directors and Shareholders' of
Wilson Sons Limited
Hamilton, Bermuda

Introduction
We have reviewed the condensed consolidated interim financial information of Wilson Sons Limited ("the Company"), contained in the quarterly information form for the quarter ended June 30, 2016, which comprises the condensed consolidated statement of financial position as at June, 30, 2016 and the respective condensed consolidated statements of profit or loss and other comprehensive income for the three and six-month periods ended at that date and changes in equity and cash flows for the six-month period then ended, as well as the explanatory notes.

Management is responsible for the preparation of the interim financial information in accordance with the IAS 34 - Interim Financial Reporting, as issued by the International Accounting Standard Board (IASB), applicable to the preparation of quarterly information. Our responsibility is to express our conclusion on this condensed consolidated interim financial information based on our review.

Scope of the review
We have conducted our review in accordance with the international interim information review standards (ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity). A review of interim information consists of making inquiries primarily to persons responsible for financial and accounting matters and applying analytical and other review procedures. The scope of a review is significantly less than that of an audit conducted in accordance with International Standards on Auditing and, accordingly, we were unable to obtain reasonable assurance that we were aware of all the material issues that would have been identified in an audit. Therefore, we do not express an audit opinion.

Conclusion on the condensed consolidated interim financial information

Based on our review, we are not aware of any fact that might lead us to believe that the condensed consolidated interim financial information included in the aforementioned quarterly information was not prepared, in all material respects, in accordance with IAS 34 applicable to the preparation of the interim information.

The Company's principal activities are divided into the following segments: towage and agency services, port terminals, offshore vessels, logistics and shipyards.

2 Significant accounting policies and critical accounting judgements

Statement of compliance

The condensed consolidated interim financial information has been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board - IASB.

Basis of preparation

The condensed consolidated interim financial information is presented in US Dollars, which is the Company's functional currency, because that is the currency of the primary economic environment in which the Group operates. Entities with a functional currency other than US Dollars are included in accordance with the accounting policies described below. All financial information presented in dollar has been rounded to the nearest thousands, except when otherwise indicated.

The condensed consolidated interim financial information has been prepared on the historical cost basis except for derivatives that are measured at fair values, as explained in the accounting policies.

The accounting policies and most significant judgments adopted by the Group's management were not modified in relation to those presented in the consolidated financial statements for the year ended 31 December 2015 approved on 20 March 2016.

As allowed by IAS 21 - The Effects of Changes in Foreign Exchange Rates, the Company also presents condensed consolidated interim financial information considering the Brazilian Real (R$) as presentation currency. The following procedures have been applied:

- Assets and liabilities for each statement of financial position presented have been translated at the closing, exchange rate at the date of that statement of financial position;

- Income and expenses for each statement of comprehensive income or separate income statement presented have been translated at average rate for the period, and

- All resulting exchange differences have been recognized as foreign currency translation in other comprehensive income.

Estimates
The preparation of condensed consolidated interim financial information requires management to make judgments, estimates and assumptions that affect the applications of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing this condensed consolidated interim financial information, significant judgments were made by management in applying the Group's accounting policies and the key source of estimation uncertainty were the same as those applied to the consolidated financial statements as at and for the year ended 31 December 2015.

Reclassification
In order to improve the quality of the financial statements, the Company´s management has decided to reclassify contingencies to revenue, employee benefits expense and income tax expense, according to the nature of the legal claims. They were previously allocated in other operating expenses.

Previous financial figures and those reclassified are as follows:

	As presented 30 June 2015 US$	Reclassified 30 June 2015 US$	As presented 30 June 2015 R$	Reclassified 30 June 2015 R$
Revenue	-	(509)	-	(1,592)
Employee benefits expense	-	(349)	-	(1,094)
Other operating expenses	(3,044)	(1,194)	(9,523)	(3,733)
Income tax expense	-	(992)	-	(3,104)
Total	(3,044)	(3,044)	(9,523)	(9,523)

The previous condensed consolidated interim statements of cash flows were also reclassified to reflect the nature of the legal claims according to the figure above.

3 Segment information

Reportable segments
For management purposes, the Group is currently organized into five reportable segments: towage and agency services, port terminals, offshore vessels, logistics and shipyards. These divisions are reported to the Group's chief operating decision maker for the purposes of resource allocation and assessment of segment performance.

Finance costs relating to liabilities were allocated to reporting segments based on the loans taken to finance the acquisition or the construction of fixed assets in that segment.

Finance income arising from bank balances held by Brazilian operating segments, including foreign exchange differences on such balances, were not allocated to the reporting segments as cash management is performed centrally by the corporate function. Administrative expenses are presented as non-segment activities.

Segment information relating to these businesses is presented below:

Tecon Salvador	7,962	9,686
Brasco	51,561	51,561
Total	99,202	106,950

The goodwill associated with each cash-generating unit (Brasco, Tecon Salvador and Tecon Rio Grande) is attributed to the Terminals segment.

As part of the annual impairment test, the carrying value of goodwill has been assessed with reference to its value in use reflecting the projected discounted cash flows of each cash-generating unit to which goodwill has been allocated. The cash-flows are based on the remaining life of the concession. Future cash flows are derived from the most recent financial budget and for the period of concession remaining.

The key assumptions used in determining value in use relate to growth rate, discount rate, inflation and interest rate. Further projections include sales and operating margins, which are based on past experience, taking into account the effect of known or likely changes in market or operating conditions.

Each cash-generating unit is assessed for impairment annually and whenever there is an indication of impairment.

The estimated average growth rate used does not exceed the historical average for Tecon Rio Grande and Tecon Salvador. Growth rate of 5.5% has been estimated for Brasco, and a discount rate of 9.5% for all business units has been used. These growth rates reflect the products, industries and countries in which the businesses operate. These medium to long-term growth rates have been reviewed by management during the annual impairment test for 2015 and are considered to be appropriate for the period.

The goodwill of Tecon Rio Grande relates to both the acquisition of that subsidiary, and the merger of other subsidiaries with Tecon Rio Grande. As the Tecon Rio Grande subsidiary has Brazilian Real as its functional currency, the part of the goodwill resulting from the merger of Tecon Rio Grande with other subsidiaries is subject to an exchange rate effects.

The cost balance of the Group's vehicles, plant and equipment includes an amount of US$11.9 million (R$38.1 million) (2015: US$12.9 million (R$50.2 million)) in respect of assets held under finance leases.

Land and buildings with a net carrying amount of US$ 0.2 million (R$0.8 million) (2015: US$0.2 million (R$0.8 million)) and Plant and Equipment with a net carrying amount of US$0.3 million (R$1.1 million) (2015: US$0.5 million (R$2.0 million)) have been pledged as guarantee for various tax lawsuits.

The Group has pledged assets with a carrying amount of approximately US$321.2 million (R$1,031.1 million) (2015: US$254.1 million (R$992.2 million)) to secure loans granted to the Group.

The amount of borrowing costs capitalized in 2016 is US$0.6 million (R$2.3 million) (2015: US$1.5 million (R$5.2 million)), at an average interest rate of 3.14% (2015: 3.00%).

On 30 June 2016, the Group had contractual commitments to suppliers for the acquisition and construction of property, plant and equipment amounting to US$13.6 million (R$44.0 million) (2015: US$13.5 million (R$52.9 million)). The amount mainly refers to the expansion of Brasco Caju, investments in Tecon Salvador and Tecon Rio Grande and purchase of raw materials for shipyard's production.

As part of the continuing review the economic useful life of its assets, the Group concluded the research of the economic useful life of the quay and the improvements to the buildings of Tecon Rio Grande in 2015. Based on the management experience and supported by technical evidence presented in a report prepared by a specialized engineer, the original useful life of the quay (25 years), estimated in the outset of the concession contract, was adjusted to 30 years (berth 1), 35 years (berth 2) and 40 years (berth 3) from 2015 up forward, due to the modernization and maintenance performed by local management, and the improvements related to the concession buildings was adjusted to 25 years. As a result of this change in estimated useful lives, the depreciation expense of Tecon Rio Grande, on 31 December 2015, was US$4.4 million (R$14.3 million) (against US$7.2 million(R$23.5 million) that would have been recorded if the change had not occurred).

In 2015 the Group also reviewed the economic useful life of the dry docking of tugboats in accordance with the frequency conducted by the Company, and supported by the technical rules issued by the Brazilian Navy. On 1 July 2015 the management adjusted the useful life of the docking costs of its tugboats (from 2.5 years to 5 years), and as result of this change the depreciation expense, on 31 December 2015, was US$1.7 million (R$4.0 million) (against US$4.4 million (R$9.9 million) that would have been recorded if there were no change).

In December 2015, management considered a number of pieces of property, plant and equipment to be discontinued in the logistics segment. Local management hired an independent firm to measure the market value of the remaining asset related to dedicated operations amounting US$0.9 million (R$3.4 million), and an impairment loss of US$0.7 million (R$2.8 million) was recognized for write-downs to the lower of its carrying amount and its fair value less cost to sell. The impairment loss had been applied to reduce the carrying amount of property, plant and equipment, and it had been included in Profit (loss) on disposal and impairment of property, plant and equipment.

Trade receivables disclosed are classified as financial assets measured at amortised cost.

Non-current trade receivables with maturities over 365 days refer principally to: (i) recoverable taxes related to PIS, COFINS, ISS, ICMS and INSS; and (ii) Intergroup loans. There is no impairment evidence related to these receivables.

As a matter of routine, the Group reviews taxes and levies impacting its business to ensure that payments of such amounts are correctly made and that no amounts are paid unnecessarily. The Group is developing a plan to use its tax credits, respecting the legal term for use of tax credits from prior years and, if the inability to recover by compensation is evidenced, requesting reimbursement of these values from the *Receita Federal do Brasil* (Brazilian Revenue Service).

The aging list of receivables for services rendered is as follows:

	30 June 2016 US$	31 December 2015 US$

Total	169,371	173,319

Generally, interest of one percent per month plus a two-percent penalty is charged on overdue balances. The Group has recognised an allowance for doubtful debts of 100% against all receivables over 180 days because historical experience shows that receivables that are past due beyond 180 days are not recoverable. Allowances for doubtful debts are recognized as a reduction of receivables, and are recognized whenever a loss is identified, based on estimated unrecoverable amounts determined by reference to past default experience of the counterparty and based on an analysis of the counterparty's current financial position.

Changes in allowance for doubtful debts are as follows:

	US$	R$
At 1 January 2015	1,154	3,065
Increase in allowance	76	238
Exchange difference	(384)	-
At 31 December 2015	846	3,303
Increase in allowance	186	652
Exchange difference	200	-
At 30 June 2016	1,232	3,955

Management believes that no additional accrual is required for the allowance for doubtful debts.

14 Cash and cash equivalents and short-term investments

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, bank accounts and short-term investments that are highly liquid and readily convertible to known amounts of cash, and which are subject to an immaterial risk of changes in value.

US dollar-denominated cash and cash equivalents refer principally to investments in deposit certificates placed with major financial institutions, Real-denominated cash and cash equivalents refer principally to investments in deposit certificates and Brazilian treasury bonds.

Short-term investments
Short-term investments comprise investments with maturity dates of more than 90 days but less than 365 days.

Private investment fund
The Group has investments in a private investment fund called the Hydrus Fixed Income Private Credit Investment Fund that is consolidated in this financial information. This fund comprises deposit certificates, financial notes and debentures, with final maturities ranging from September 2016 to March 2021. The fund portfolio is marked to fair value on a daily basis against current earnings. These fund´s financial obligations are limited to service fees to the asset management company employed to execute investment transactions, audit fees and other similar expenses. The fund´s investments are highly liquid which are readily convertible to known amounts of cash and which is subjected to as insignificant risk of changes in value.

Additionally, US Dollar linked investments are made through Itaú Cambial FICFI, whose purpose is to preserve the US dollar value of the investment.

Covenants
The Wilson, Sons de Administração e Comércio Ltda. ("WSAC") holding company, as corporate guarantor, has to comply with financial covenants in both Wilson Sons Estaleiros and Brasco Logística Offshore loan agreements signed with BNDES.

The subsidiary Tecon Rio Grande has to comply with financial covenants in its loan agreement with BNDES, such as a minimum liquidity ratio and capital structure.

The subsidiary Tecon Salvador has to observe affirmative and negative covenants stated in its loan agreement with the International Finance Corporation - IFC, including the maintenance of specific liquidity and capital structure ratios.

As a result of the devaluation of the Brazilian Real against the US Dollar at 30 September 2015 Tecon Salvador S.A. was in excess of the maximum covenant of financial debt to tangible net worth ratio in Brazilian Real for its loan agreement with IFC. Tecon Salvador S.A. was granted a waiver for compliance valid until 30 September 2016. The value of the Loan amounted to US$53.8 million (R$172.6 million) at 30 June 2016.

At 30 June 2016, the Company was in compliance with all clauses in the above mentioned loan contracts.

At 30 June 2016	(66,332)	90,536	46,842	(138,266)	(67,220)

Certain tax assets and liabilities have been offset on an entity-by-entity basis. After offset, deferred tax balances are disclosed in the balance sheet as follows:

	30 June 2016 US$	31 December 2015 US$
Deferred tax liabilities	(50,787)	(52,631)
Deferred tax assets	29,845	32,128

Deferred tax liabilities	(163,016)	(205,513)
Deferred tax assets	95,796	125,453
Total	(67,220)	(80,060)

At the end of the reporting period, the Group has unutilized tax loss carry forwards of US$31.8 million (R$102.0 million) (2015: US$17.9 million (R$69.9 million)) available for offset against future taxable income.

Also, a deferred tax asset in the amount of US$10.8 million (R$34.7 million) (2015: US$6.1 million (R$23.8 million)) has not been recognized due to the unpredictability of this portion of future flows of related taxable income.

Deferred tax assets and liabilities arise on Brazilian property, plant and equipment, inventories and prepaid expense held in US Dollar functional currency businesses. Deferred taxes are calculated on the difference between the historical US Dollar balances recorded in the Group's accounts and the Real balances used in the Group's Brazilian tax calculations.

Deferred tax liabilities arise from exchange gains on the Group's US dollar-denominated borrowings and the real-denominated loans pegged to the US dollar that are taxable when settled and not in the period in which the gains arise.

17 Provisions for tax, labour and civil risks

	US$	**R$**

Addition to provision	242	894
Exchange difference	3,051	-
At 30 June 2016	17,215	55,257

The breakdown of the provision by type of risk is as follows:

	30 June 2016 US$	**31 December 2015 US$**
Civil cases	1,793	2,219
Tax cases	3,164	2,492
Labour claims	12,258	9,211

	30 June 2016 R$	**31 December 2015 R$**
Civil cases	5,755	8,666
Tax cases	10,155	9,731
Labour claims	39,347	35,966
Total	55,257	54,363

In the normal course of business in Brazil, the Group is exposed to numerous local legal claims. It is the Group's policy to vigorously contest such claims, many of which appear to have little substance or merit, and to manage such claims through its lawyers.

In addition to the cases for which the Group booked the provision there are other tax, civil and labour disputes amounting to US$122.0 million (R$391.5 million) (2015: US$84.1 million (R$328.5 million)) with probability of loss estimated by the legal counsels as possible.

The breakdown of possible claims is described as follows:

	30 June 2016 US$	31 December 2015 US$
Civil cases	10,433	4,453
Tax cases	89,342	63,056
Labour claims	22,206	16,609
Total	121,981	84,118

	30 June 2016 R$	31 December 2015 R$
Civil cases	33,488	17,388
Tax cases	286,770	246,220
Labour claims	71,277	64,856
Total	391,535	328,464

The main probable and possible claims against the Group are described below:

Civil and environmental cases - Indemnification claims involving material damages, environmental and shipping claims and other contractual disputes.

Labour claims - Most claims involve payment of health risks, additional overtime and other allowances.

Tax cases - The Group litigates against governments in respect of assessments considered inappropriate.

Procedure for classification of legal liabilities identifies claims as probable, possible or remote through evaluation by the external lawyers:

Upon receipt of the notification of a new judicial lawsuit, the external lawyer generally classifies it as a possible claim, recorded at the total amount involved. Wilson Sons uses the criteria of the estimated value at risk and not the total order value involved in each process.

Exceptionally, if there is sufficient knowledge from the beginning that there is very high or very low risk of loss, the lawyer may classify the claim as a probable loss or remote loss.

During the course of the lawsuit and considering, for instance, its first judicial decision, legal precedents, arguments of the claimant, thesis under discussion, applicable laws, documentation for the defense and other variables, the lawyer may re-classify the claim as a probable loss or remote loss.

When classifying the claim as a probable loss, the lawyer estimates the amount at risk for such claim.

The Group considers as relevant causes involving amounts, assets or rights over US$1.6 million (R$5.0 million).

Total current	3,926	4,655	-	-
Total non-current	5,043	5,998	-	-

It is the Group's policy to lease certain of its vehicles and equipment under finance leases. The average original lease term is 60 months, of which an average of 32 months remained outstanding at the 30 June 2016.

For the period ended 30 June 2016, the average effective leasing interest rate was 16.91% (31 December 2015: 16.75%). Interest rates are set at contract date.

All leases include a fixed repayment and a variable finance charge linked to the Brazilian interest rate. The interest rates range from 15.91% p.a. to 18.54% p.a. Leases are denominated in Reais.

There is a no significant difference between the fair value and the present value of the Group's lease obligations. The present value is calculated with its own interest rate over the future installments of each contract.

The Group's obligations under finance leases are secured by the lessors' rights to the leased assets.

20 Stock options plan and post-employment benefits

20.1. Stock option plan

On 13 November 2013, the board of Wilson Sons Limited approved a Stock Option Plan, which allowed for the grant of options to eligible participants to be selected by the board. The shareholders in special general meeting approved such plan on the 8 January 2014 including increase in the authorized capital of the Company through the creation of up to 4,410,927 new shares. The options provide participants with the right to acquire shares via Brazilian Depositary Receipts ("BDR") in Wilson Sons Limited at a predetermined fixed price not less than the three day average mid price for the days preceding the date of option issuance. The Stock Option Plan is detailed below:

Options series	Grant date	Original vesting date	Expiry date	Exercise price (R$)	Number	Expired	Vested	Outstanding not Vested	Total Subsisting

Expected volatility was determined by calculating the historical volatility of the Group's share price. The expected life used in the model has been adjusted based on management´s best estimate for exercise restrictions and behavioral considerations.

20.2. Post-employment benefits

The Group operates a private medical insurance scheme for its employees which require the eligible employees to pay fixed monthly contributions. In accordance with regulation of the Brazilian law, eligible employees with greater than ten years service acquire the right to remain in the plan following retirement or termination of employment, generating a post-employment commitment for the Group. Ex-employees remaining in the plan will be liable for paying the full cost of their continued scheme membership. The present value of actuarial liabilities in 30 June 2016 is US$1.7 million (R$5.5 million) (2015: US$1.3 million (R$5.1 million). The future actuarial liability for the Group relates to the potential increase in plan costs resulting from additional claims as a result of the expanded membership of the scheme.

Actuarial assumptions

The calculation of the liability generated by the post-employment commitment involves actuarial assumptions. The following are the principal actuarial assumptions at the reporting date:

The calculation of the basic and diluted earnings per share is based on the following data:

	30 June 2016 US$	30 June 2015 US$	30 June 2016 R$	30 June 2015 R$
Profit for the period attributable to owners of the Company	47,739	14,890	172,283	50,251
Weighted average number of common shares	71,144,000	71,144,000	71,144,000	71,144,000
Basic earnings per share (cents per share)	67.10	20.93	242.16	70.63
Weighted average number of common shares	73,793,000	73,968,000	73,793,000	73,968,000
Diluted earnings per share (cents per share)	64.69	20.13	233.47	67.94

Capital reserves

The capital reserves arise principally from transfers from revenue which in prior periods were required by law to be transferred to capital reserves and other profits not available for distribution, share premium on incoming IPO issues and gains/losses on purchase and sale of non-controlling interest.

Profit reserve

An amount equal to 5% of the Company's net profit for the current year is to be credited to a retained earnings account to be called "Profit Reserve" until such account equals 20% of the Company's paid up share capital. The Company does not recognize any further profit reserve, because it has already reached the limit of 20% of share capital.

Additional paid in capital

The additional paid in capital arises from purchase of non-controlling interests in Brasco, sales of shares to non-controlling interests of Tecon Salvador in 2011 and the purchase of non-controlling interests in Tecon Salvador in 2016.

Translation reserve

The translation reserve arises from exchange differences on the translation of operations with a functional currency other than the US Dollar.

Guarantees

Wilson Sons Offshore's loan agreements with BNDES are guaranteed by a lien on the financed supply vessels, and in the majority of the contracts, a corporate guarantee from both Wilson Sons Adminisração e Comércio and Remolcadores Ultratug Ltda, each guaranteeing 50% of its subsidiary's debt balance with BNDES.

Magallanes Navegação Brasileira's (subsidiary of Wilson, Sons Ultratug Participações S.A.) loan agreement with Banco do Brasil is guaranteed by a pledge on the financed supply vessels. The security package also includes a standby letter of credit issued by Banco de Crédito e Inversiones - Chile for part of the debt balance, assignment of Petrobras' long-term contracts and a corporate guarantee issued by Inversiones Magallanes Ltda - Chile. A cash reserve account, accounted for under long term investments, funded with US$2.0 million (R$6.5 million) should be maintained until full repayment of the loan agreement.

The loan agreement Atlantic Offshore has with Deutsche Verkehrs-Bank “DVB” and Norddeutsche Landesbank Girozentrale “Nord/LB” for the financing of the offshore support vessel "Pardela" is guaranteed by a pledge on the vessel, the shares of Atlantic Offshore and a corporate guarantee for half of the credit from Wilson Sons de Administração e Comércio. Remolcadores Ultratug LTDA which is the partner in the business, guarantee the other half of the loan.

Covenants

Annually, the joint venture Magallanes Navegação Brasileira S.A. has to comply with specific financial covenants. As at 31 December 2015, the company was in compliance with all clauses in the loans contracts.

Atlantic Offshore has to comply with specific financial covenants on its two loan agreements with Deutsche Verkehrs-Bank “DVB”. On 28 July 2016 Atlantic Offshore received a temporary waiver of non-compliance with Debt Service Coverage Ratio for both loans up to 31 March 2017, and is in compliance with the remaining covenants.

Provisions for tax, labour and civil risks

In the normal course of business in Brazil, the Wilson Sons Ultratug Offshore (WSUT) remains exposed to numerous local legal claims. It is the WSUT policy to vigorously contest such claims, many of which appear to have little substance in merit, and to manage such claims through its legal counsel.

WSUT booked provisions related to labour claims amounting to US$0.1 million (R$0.3 million) (2015: US$0.1 million (R$0.3 million)), whose probability of loss was estimated as probable.

In addition to the cases for which WSUT booked the provision, there are other tax, civil and labour disputes amounting to US$13.5 million (R$43.2 million) (2015: US$9.7 million (R$37.8 million)), whose probability of loss was estimated by the legal counsel as possible.

The breakdown of possible losses is described as follows:

	30 June 2016 US$	**31 December 2015 US$**
Civil cases	-	1
Tax cases	9,727	7,600

24 Operating lease arrangements and other obligations

The Group as lessee

The minimum lease payments under operating leases recognized in income at 30 June 2016 was US$0.7 million (R$2.3 million) (2015 US$4.8 million (R$18.6 million)).

On 30 June 2016, the minimum amount due by the Group for future lease payments under cancellable operating leases was US$5.7 million (R$18.4 million) (2015: US$8.1 million (R$31.7 million)).

Lease commitments for land and buildings with a term of over 5 years are recognized as an expense on a straight-line basis over the lease term. These operating lease arrangements are mainly concluded between Tecon Rio Grande and the Rio Grande port authority, and between Tecon Salvador and the Salvador port authority. The Tecon Rio Grande minimum period extends to 2022 and the Tecon Salvador minimum period extends to 2025. Both have an option to renew the concession for a maximum period of 25 years.

In respect of the option to renew the lease of Tecon Rio Grande, the port authority of Rio Grande has, in consideration of investments made, ensured the Company the right to renew the contract, provided the State government remains the delegated authority of the area or has in other legal way, ownership of the same.

In respect of the option to renew the lease of Tecon Salvador, Wilson Sons has requested renewal in consideration of an investment project currently awaiting technical approval and contractual agreement.

The Tecon Rio Grande guaranteed payments consist of two elements: a fixed rental, and fee per 1,000 containers moved based on minimum forecast volumes.

Tecon Salvador guaranteed payments consist of three elements: a fixed rental, a fee per container handled based on minimum forecast volumes and a fee per ton of non-containerized cargo handled based on minimum forecast volumes.

At the end of the reporting period, the Group had outstanding commitments for future minimum lease payments under non-cancellable operating leases, which fall due as follows:

	30 June 2016 US$	31 December 2015 US$	30 June 2016 R$	31 December 2015 R$
Within one year	16,208	15,655	52,024	61,130

Total	127,345	115,066	408,751	449,310

The Group as lessor

The Group leases out part of assets and machinery related to dedicated operations, which were discontinued in the logistics segment. At the end of the reporting period, the future minimum lease payments under non-cancellable operating leases were US$0.1 million (R$0.2 million) (2015: US$0.2 million (R$0.5 million)), fully receivable within one year. Also, the rental related to these non-cancellable operating leases were recognized in profit or loss amounting to US$0.1 million (R$0.3 million) (2015: US$0.9 million (R$3.1 million)).

25 Financial instruments and risk assessment

a. Capital risk management

The Group manages its capital to ensure that its entities will be able to continue as going concerns, while maximizing the return to stakeholders through the optimization of the debt and equity balance. The Group's capital structure consists of debt (which includes the borrowing disclosed in Note 15), cash and cash equivalents and short-term investments disclosed in Note 14, and equity attributable to owners of the parent company comprising issued capital, reserves, and retained earnings as disclosed in Note 21.

c. Financial risk management objectives

The Group's Structured Finance department monitors and manages financial risks related to the operations. A financial risk committee has been established and meets regularly to assess financial risks and decide mitigation based on guidelines stated in the group's financial risk policy.

These risks include market risk, credit risk and liquidity risk. The primary objective is to keep a minimum exposure to those risks by using financial instruments and by assessing and controlling the credit and liquidity risks. The Group may use derivatives and other financial instruments for hedging purposes only.

d. Foreign currency risk management

The operating cash flows are exposed to currency fluctuations because they are denominated partially in Brazilian Real. These proportions vary according to the characteristics of each business.

Cash flows from investments in fixed assets are denominated partly in Brazilian Real. These investments are subject to currency fluctuations between the moment when the prices of those goods or services are settled and the actual payment date. Funding and its application is monitored with the purpose of matching the currency cash flows and due dates.

The Group has undertaken part of its debt denominated in Brazilian Real. Cash and cash equivalents are denominated part in Brazilian Real and part in US Dollar.

In general terms, the Group seeks to neutralize the currency risk of operating cash flows by matching revenues and expenses. Furthermore, the Group seeks to generate an operating cash surplus in the same currency in which the debt service of each business is denominated.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at the reporting dates are as follows:

Foreign currency sensitivity analysis

The sensitivity analysis presented in the following sections, which refer to the position on 30 June 2016, estimates the impacts of the Brazilian Real devaluation against the US Dollar. A baseline scenario is determined based both on the carrying value of the operations, and the "PTAX" rate as of 30 June 2016. Then, three additional, exchange rate scenarios are contemplated: the likely scenario (Probable) and two possible scenarios of deterioration of 25% (Possible) and 50% (Remote) in the exchange rate. The Group uses the Brazilian Central Bank's "Focus" report to determine the probable scenario.

e. Interest rate risk management

The Group holds most of its debt linked to fixed rates. Most of the Group's fixed rate loans are with the FMM.

Other loans exposed to floating rates are as follows:

- TJLP (Brazilian Long Term Interest Rate) for Brazilian Real-denominated funding through FINAME credit line to port and logistics operations;
- DI (Brazilian Interbank Interest Rate) for Brazilian Real-denominated funding oflogistics operations, and
- 6-month Libor (London Interbank Offered Rate) for US Dollar-denominated funding of port operations (Eximbank).

The Brazilian Real-denominated investments yield interest rates corresponding to the DI daily fluctuation for privately-issued securities and/or “Selic-Over” government-issued bonds. The US Dollar-denominated investments are time deposits, with short-term maturities.

Interest rate sensitivity analysis

The Group does not account for any financial asset or liability interest rate at fair value through profit or loss. Therefore, a change in interest rates at the reporting date would not change the result. The Group uses two important information sources to estimate the probable scenario, BM&F (*Bolsa de Mercadorias e Futuros*) and Bloomberg.

The following analysis concerns a possible fluctuation of revenue or expenses linked to the transactions and scenarios shown, without considering their fair value.

Derivative financial instruments

The Group may enter into derivative contracts to manage risks arising from interest rate fluctuations. All such transactions are carried out within the guidelines set by the Risk Management Committee. Generally the Group seeks to apply hedge accounting in order to manage volatility in profit or loss.

The Group uses cash flow hedges to limit its exposure that may result from the variation of floating interest rates. On 16 September 2013, Tecon Salvador, entered into an interest rate swap agreement with an initial notional amount of US$74.4 million to hedge a portion of its outstanding floating-rate debt with IFC. On 30 June 2016 the notional amount was US$54.2 million, equivalent to the outstanding debt amount on that date. This swap converts floating interest rate based on the London Interbank Offered Rate, or LIBOR, into fixed-rate interest and expires in March 2020.The derivatives were entered into with Santander Brasil as counterparty and its credit rating was AA, as of 30 June 2016, according to Standard & Poor's Brazilian local rating scale.

Tecon Salvador is required to pay the counterparty a stream of fixed interest payments at rates fixed from 0.553% to 4.250%, according to the schedule agreement, and in turn, receives variable interest payments based on 6-month LIBOR. The net receipts or payments from the swap are recorded as financial expense.

Fair Value

The swap fair value was estimated based on the yield curve as of 30 June 2016, and represents its carrying value. As of 30 June 2016, the interest rate swap balance in other non-current liabilities was US$3.0 million; and the balance in accumulated other comprehensive income on the consolidated balance sheet was US$3.3 million. The net change in fair value of the interest rate swap recorded as other comprehensive income for the period ended 30 June 2016 was an after tax loss of US$0.4 million.

Derivative Sensitivity Analysis

This analysis is based on 6-month Libor interest rate variances that the Group considered to be reasonably possible at the end of the reporting period. The analysis assumes that all other variables, in particular foreign exchange rates, remain constant and ignores any impact of forecast sales and purchases. Three scenarios were simulated: the likely scenario (Probable) and two possible scenarios of reduction of 25% (Possible) and 50% (Remote) in the interest rate.

					30 June 2016
Probable scenario US$	**Possible scenario (25%) US$**	**Remote scenario (50%) US$**	**Probable scenario R$**	**Possible scenario (25%) R$**	**Remote scenario (50%) R$**
(2,966)	(3,217)	(3,470)	(9,520)	(10,325)	(11,137)

Cash Flow Hedge

The Group applies hedge accounting for transactions in order to manage the volatility in earnings. If a swap is designated and qualifies as a cash flow hedge the swap is accounted for as an asset or a liability in the accompanying consolidated balance sheets at fair value. The effective portion of changes in fair value of the derivative is recognized in other comprehensive income and presented as an asset revaluation reserve in equity. Any ineffective portion of changes in fair value of the derivative is recognized immediately in the profit or loss.

If the hedging instrument no longer meets the criteria for hedge accounting operations, expires or is sold, terminated or exercised, or the designation is revoked, the hedge accounting is discontinued prospectively when there is no further expectation for the forecast transaction, and then the amount stated in the equity is reclassified to the profit or loss.

On the initial designation of the derivative as a hedging instrument, the Group formally documents the relationship between the hedging instrument and the hedged transaction, including the risk management objective and strategy on the implementation of the hedge and the hedged risk, together with the methods that will be used to evaluate the effectiveness of the hedging relationship. The Group is utilizing the dollar offset method to assess the effectiveness of the swap, analyzing whether the hedging instruments are highly effective in offsetting changes in fair values or cash flows of the respective hedged items attributable to the hedged risk, and if the actual results for each coverage are within the range from 80 - 125 percent.

Under this methodology, the swap was deemed to be highly effective for the period ended 30 June 2016. There was no hedge ineffectiveness recognized in profit or loss for the year ended 30 June 2016.

f. Liquidity risk management

The Group manages liquidity risk by maintaining adequate cash reserves, banking facilities and reserve borrowing facilities, continuously monitoring forecast and actual cash flows, and matching the maturity profiles of financial assets and liabilities.

Liquidity risk is the risk that the Group will encounter difficulty in fulfilling obligations associated with its financial liabilities that are settled with cash payments or other financial assets. The Group's approach in managing liquidity is to ensure that the Group always has sufficient liquidity to fulfill the obligations that expire, under normal and stress conditions, without causing unacceptable losses or risk damage to the reputation of the Group.

Group ensures it has sufficient cash reserves to meet the expected operational expenses, including financial obligations. This practice excludes the potential impact of extreme circumstances that cannot be reasonably foreseen, such as natural disasters.

The following tables detail the Group's remaining contractual maturity for its non-derivative financial liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The table includes both interest and principal cash flows.

g. Credit risk

The Group's credit risk can be attributed mainly to balances such as cash and cash equivalents and trade receivables. Trade and other receivables disclosed in the balance sheet are shown net of the allowance for doubtful debts.

The allowance is booked whenever a loss is identified, which based on past experience is an indication of impaired cash flows.

The Group invests temporary cash surpluses in government and private bonds, according to regulations approved by the management, which follow the Group policy on credit risk concentration. Credit risk on investments in non-government backed bonds is mitigated by investing only in assets issued by leading financial institutions.

The Group's sales policy follows the criteria for credit sales set by management, which seeks to mitigate any loss due to customer default.

h. Fair value of financial instruments

The Group's financial instruments are recorded in balance sheet accounts at 30 June 2016 and 31 December 2015 at amounts similar to the fair value at those dates. These instruments are managed though operating strategies aimed to obtain liquidity, profitability and security. The control policy consists of ongoing monitoring of rates agreed versus those in force in the market, and confirmation of whether its short-term financial investments are being properly marked to market by the institutions dealing with its funds.

The determination of estimated realization values of Company's financial assets and liabilities relies on information available in the market and relevant assessment methodologies. Nevertheless, considerable judgment is required when interpreting market data to derive the most adequate estimated realization value.

IFRS 7 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to measurements involving significant unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

All the Group's financial instruments (as disclosed in note 25 b) are considered as level 2. There were no amounts related to levels 1 and 3 at 30 June 2016 and 31 December 2015.

i. Criteria, assumptions and limitations used when computing market values

Cash and cash equivalents
The market values of the bank current account balances are consistent with book balances.

Investments
The carrying amounts of short-term investments approximate their fair value.

Trade and other receivables/payables
According to the Group's management the book balances of trade and other receivables and payables approximate fair values.

Bank and loans
Fair value of loan arrangements were calculated at their present value determined by future cash flows and at interest rates applicable to instruments of similar nature, terms and risks or at market quotations of these securities. Fair value measurements recognized in the consolidated financial information are grouped into levels based on the degree to which the fair value is observable.

The fair values of BNDES, BB, IFC, Finimp and Eximbank financing arrangements are similar to their carrying amounts since there are no similar instruments, with comparable maturity dates and interest rates.
