Wilson Sons reports 2017 EBITDA of US\$172.4M, an 11.8% increase in US Dollars

- Container Terminals reached record volumes.
- Towage harbour manoeuvres solid despite increased competition.
- Safety performance improved by 35%, in line with world-class standards.
- Proposed dividend of US\$38.5M, an increase of 4.2% over the previous year.

In 2017, we celebrated Wilson Sons' 180th anniversary and delivered robust results in a challenging economic environment. The Company reported annual EBITDA of US\$172.4M. an increase of 11.8% YoY.

Container Terminals reached record annual volumes as Brazilian trade flow demonstrated some early indications of recovery by the end of the year. Both terminals deployed new equipment and upgraded their operating systems. Rio Grande posted a 39% increase in productivity, and by January 2018 its inland waterway service had sufficient volume to commence a second weekly call linking the north of the State directly to the Port of Rio Grande. After the year end, Tecon Salvador achieved a record of 102 movements per hour following recent investments. We continue to take all the necessary measures to ensure the expansion of Salvador and are currently awaiting environmental licensing to begin civil works.

The Towage business reported higher harbour manoeuvres, despite increased competition. The division signed US\$62M in financing agreements with the Brazilian Development Bank (BNDES) for the construction and maintenance of tugboats in the coming years.

Despite continued stress throughout the oil industry our Offshore Support Vessels joint venture was awarded three new long-term contracts. Brazil's recent success in pre-salt oilfield auctions reinforces a more favourable long-term outlook. However, the short term remains challenging.

Once more we would like to thank all our stakeholders, but in particular the efforts of all our staff for their contribution to these solid results and their continued commitment to safety.

Cezar Baião, CEO of Operations in Brazil

Cinemaial Himbliobta

Net Revenues

US\$ revenues increased 3.6% YoY in 4Q17 with a better mix between export and import. Reduced revenues related to a fall in Shipyard construction for third parties, Towage special operations and Offshore Vessel activities, reflecting a challenging oil services market.

Costs and Expenses

Despite a 1.5% YoY appreciation of the R\$ average exchange rate against the US\$, overall expenses in US\$ were 4.2% lower than the comparative. The following items were observed:

- · Raw Materials costs were down with the decline of Shipyard activities.
- Personnel Expenses increased YoY despite a 3.6% headcount reduction, mainly impacted by higher payroll taxes and the provision of contingencies in the Logistics business.
- Container Handling costs increased due to improved volumes in Container Terminals and in the Logistics Non-Vessel Operating Common Carrier (NVOCC) business, Allink.
- Other Expenses and Other Financial Results in the quarter benefited from one-off US\$4.9M tax credit originally paid to the Special Fund for Development and Improvement of Auditing Activities (FUNDAF). This credit for the Logistics business relates to favourable court rulings.

EBITDA

EBITDA was up 20.6% YoY due to higher revenues, decreased costs and the one-off FUNDAF effects highlighted above.

Profit

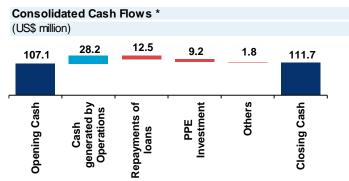

- Depreciation increased essentially due to the stronger average R\$ exchange rate and its effects on subsidiaries with R\$ functional currency.
- Profit was affected by the following foreign exchange effects on our consolidated income statement:
 - a US\$1.8M exchange loss caused by balance sheet translations of R\$
 denominated net monetary assets, such as net accounts payable,
 accounts receivable, and cash & equivalents;
 - a net US\$0.2M positive impact on deferred taxes principally a result of the balance between the Company's fixed assets and US\$ loans. The R\$ appreciation increased the net future tax deduction allowable of net assets and loans when converted to the US\$ reporting currency; and
 - a US\$3.0M negative FX impact on investments and loans due to US\$ denominated debt in subsidiaries with R\$ reporting currency.
- 4Q17 Profit excluding the items identified above would have been US\$18.4M.

EBITDA	(6.6)	(5.7)	-15.6

^{*} Corporate costs include head-office and Group support functions together with costs not allocated to the individual businesses.

CAPEX

- The IFRS quarterly CAPEX decreased substantially as the Company recently concluded a significant investment cycle of capacity expansion.
- Non-consolidated CAPEX for the Offshore Support Vessels joint venture ("WSUT") increased with planned dry-docking operations in the quarter.

Debt and Cash Profiles

- A decrease of 7.0% in Net Debt to US\$244.1M during the quarter reflected natural reduction in debt outstanding with amortization together with increases in Cash and Equivalents. Debt service ratios benefited from low average interest costs and long maturity profile.
- The reported IFRS figures do not include US\$234.1M of net debt from the Company's 50% share in the Offshore Support Vessels joint venture.
- Net Debt to EBITDA ratio for the trailing twelve months was 1.4x. If the Offshore Support Vessels business was proportionally consolidated, the trailing twelve-month Net Debt to EBITDA would have been 2.3x.
- Cash, Cash Equivalents and Short-term Investments increased from the previous quarter to US\$111.7M, primarily due to positive net cash generated by operations.
- · At quarter-end, 84.5% of the Company's debt was long-term.
- At 31 December 2017, the Group had US\$51.0M of undrawn borrowing facilities available. On 17 October Wilson Sons announced the signature of US\$8.0M financing agreement with the Merchant Marine Fund (FMM) through its agent the Brazilian Development Bank (BNDES) for the repair and maintenance of 12 tugboats in the coming years.

Corporate Costs

 Corporate costs were higher mainly due to one-off provisions and donations and sponsorships totalling US\$0.7M which benefit from tax incentive laws.

^{**} Property, Plant and Equipment Cash Investment.

^{**} Corporate costs are predominantly denominated in R\$.

PORT & LOGISTICS SERVICES

Container Terminals

Container Terminal EBITDA benefited from an improved revenue mix. Results improved in the quarter largely driven by a robust operating performance as described below.

- Tecon Rio Grande (YoY Highlights):
 - Overall volumes increased by 7.9% against the comparative, and full containers improved by 6.5%;
 - Exports were up 6.0% driven by rice, wood and frozen chicken;
 - Imports increased 2.8% with improved volumes of spare parts, chemicals and steel products;
- Cabotage improved 22.7% mainly due to rice, resins and furniture; and
- Other volumes increased 3.6% due to higher transshipment volumes supported by the Santa Clara inland waterway service.
- Tecon Salvador (YoY Highlights):
 - Overall volumes increased by 5.5% against the comparative, and full containers improved 6.5%;
 - Exports were down 1.8% negatively impacted by weaker volumes of tyres, ores and pulp;
 - Imports showed a slight increase despite the decline in solar panels volumes:
 - Cabotage improved 33.8% supported by a pick-up in volumes of food products and polymers; and
 - Other volumes fell 7.3% due to a weaker performance of transshipment operations.

In December, Rio Grande achieved a record net productivity of 159 movements per hour, following recent investments in equipment and operating system upgrade. In January 2018, its inland waterway service had sufficient volume to commence a second weekly call linking the north of the State directly to the Port of Rio Grande.

After the quarter end, Salvador reached a record net productivity of 102 movements per hour, following recent investments in equipment and operating system upgrade. The Company continues to take all the necessary measures to ensure the expansion of Salvador and is currently awaiting environmental licensing to begin civil works.

Oil & Gas Support Base ("Brasco")

- Brasco posted a slight decline in revenues YoY reflecting the tough oil sector backdrop, despite the increase of vessel turnarounds.
- Revenues were supported by improved volumes of lay-up operations in Brasco Rio. EBITDA improved with cost control measures.
- After the quarter end, Brasco signed a new contract with Total to provide logistics support to producing activities in the Lapa pre-salt field.

Logistics (Considering 100% share of Allink NVOCC)

- Improved volumes for bonded warehousing and Allink contributed to an increase in revenues.
- Expenses were lower as a result of one-off US\$4.9M tax credit originally paid to FUNDAF, with favourable court rulings in the quarter.

MARITIME SERVICES

Towage

- Revenues from harbour manoeuvres improved 1.4% YoY helped by a better average price and handling of larger vessels.
- Revenues from special operations declined 41.7% YoY, reflecting the reduced demand from the oil and gas industry and the more volatile nature of this activity, which includes salvage, fire-fighting and other operations.
- Towage EBITDA was in line YoY despite the decline in special operations.
- Shipping Agency EBITDA reduced with lower revenues and stronger R\$.

Offshore Support Vessels (Considering 50% share of Joint Venture - "WSUT")

- Offshore Support Vessels JV reported a 22.8% reduction in revenues as WSUT negotiated new contract terms with Petrobras for eight PSVs in 3Q17. The agreement defined (i) a temporary suspension of six of these contracts due to current suppressed demand, with the original contract term extended by a period equal to the suspension; and (ii) a reduction of the vessels' daily rates. The negotiation contemplated a total reduction of 6% in the fleet average gross daily rate and an aggregate 858 days suspension for all the vessels combined.
- Days in Operation declined 29.8% negatively impacted by the temporary suspension of six PSVs commencing in September and October.
- Operating costs did not reflect the decline in revenues given the temporary nature of the six-vessel suspension which limited cost reductions.
 Additionally, reduced crew costs were offset by redundancy payments.
- In 2018, five of the six suspended vessels have recommenced contracts during the first quarter, and the remaining PSV is expected to resume operating in July.
- During the quarter, WSUT was awarded a two-year contract for PSV Gaivota to provide platform support and oil spill recovery services commencing in May 2018. WSUT was also awarded new three-year contracts for PSVs Mandrião and Pardela to provide shallow-water diving support services commencing in April 2018. All new contracts were awarded by Petrobras, and the three vessels will require some modifications.

Shipyards

- Shipyard revenues were down 45.6% YoY reflecting the reduced thirdparty shipbuilding activities.
- During the quarter, the Company delivered SST-Aruá for a client, the second tugboat of a total order of 4 vessels.
- EBITDA improved YoY due to the stage of construction and mix of vessels.
- At the end of December 2017, the Shipyard construction orderbook consisted of four vessels, including two 80-tonne bollard pull tugboats for Wilson Sons to be delivered in 2018 and 2019 and two 70-tonne bollard pull tugs for third parties to be delivered in 2018. There are also 15 drydocking operations scheduled for 2018, including five tugboats for Wilson Sons, two PSVs for WSUT JV, and seven tugboats and one floating crane for third parties.

2017 ANNUAL SUMMARY

Net Revenues

 US\$ revenues increased 8.6% YoY in 2017 mainly reflecting the solid result in Container Terminals and a stronger R\$ against the US\$.

Costs and Expenses

The R\$ average exchange rate appreciated by 8.3% YoY against the US\$, contributing to general increases in US\$ reported costs. The following items were observed:

- Raw Materials were relatively unchanged with reduced operating materials from the Shipyard offset by increased costs of petrol and oil.
- Personnel Expenses increased YoY despite a 7.4% headcount reduction, mainly caused by (i) the provision of contingencies; (ii) one-off redundancy costs related to restructuring; (iii) the recommencement of payroll taxes in July, revoked by the government in August; and (iv) the provision for bonus and the law-mandated annual payroll adjustment.
- Freight and Rentals increased with improved volumes in the Logistics business and the consolidation of Rio Grande's inland waterway service.
- Rent of Tugs was lower with the delivery of six new vessels to the Wilson Sons fleet throughout 2016, reducing charter requirements.
- Container Handling costs increased due to improved volumes in Container Terminals and the Logistics Non-Vessel Operating Common Carrier (NVOCC) business, Allink.
- Other Expenses and Other Financial Results benefited from one-off US\$7.5M tax credit originally paid to FUNDAF. This credit for the Logistics and Container Terminal businesses relates to favourable court rulings.
- Loss on Disposal of PP&E includes depot write downs for leasehold improvements at a site no longer used by the Company.

EBITDA

EBITDA was up 11.8% YoY due to higher revenues and one-off FUNDAF effects, despite the increase in costs.

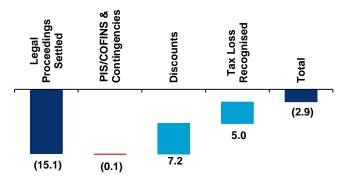

Profit (part 1 of 2)

- Depreciation increased essentially due the stronger R\$ average exchange rate and its effects on subsidiaries with R\$ functional currency, and the investments made in 2016.
- Profit for the year was affected by the following foreign exchange effects on our consolidated income statement:
 - a US\$1.3M exchange gain caused by balance sheet translations of R\$
 denominated net monetary assets, such as net accounts payable and
 receivable, cash & equivalents;
 - a net US\$0.2M positive impact on deferred taxes principally a result of the Company's fixed assets and US\$ loans. With the R\$ appreciation, the net future tax deduction allowable of net assets and loans represented a greater amount when converted to the US\$ reporting currency; and
 - a US\$0.8M positive FX impact on investments and loans due to US\$ denominated debt in subsidiaries with R\$ reporting currency.
- 2017 Profit excluding the items identified above would have been US\$70.5M.

Lost Time Injury Frequency Rate (LTIFR)

(including all employees since 2013)

- * LTIFR refers to the number of lost-time injuries occurring in a workplace per one million manhours worked.
- ** Considering total results of WSUT, of which Wilson Sons owns 50%

2017 ANNUAL SUMMARY

Profit (part 2 of 2)

 During the year, Wilson Sons applied for the Brazilian Federal Tax Amnesty Program (PERT), according to Law no. 13.494, of 24 October 2017. This enabled the use of the benefits proposed in this program to settle legal proceedings in the total amount of US\$15.1M, which, after the reductions, was settled using US\$5.0M tax losses and US\$1.1M in cash. These amounts had a total negative impact of US\$2.9M on Profit.

CAPEX

- The Pro Forma annual CAPEX decreased substantially as the Company recently concluded a significant investment cycle of capacity expansion.
- Non-consolidated CAPEX for the Offshore Support Vessels joint venture ("WSUT") decreased with the 2016 completion of the construction plan for the 23 vessels currently in the fleet.

Health, Safety and Environmental Practices (HSE)

- Improvements in workplace safety were evidenced by the 94% reduction in Lost Time Injury Frequency Rate (LTIFR*) between 2010 and 2017, achieving a level of global best practice. Lost-time injuries registered 0.45 per one million man-hours worked.
- In October, the Group was honoured by DuPont for its track record in HSE management in recent years having achieved four awards in five editions since 2012.
- In August, Wilson Sons published its 4th Corporate Inventory of Greenhouse Gas Emissions (GHG) as per the GHG Protocol methodology.
- Wilson Sons continues to monitor its performance through environmental and other social responsibility indexes, as disclosed in the 2016 Annual Integrated Report published on the Company's website www.wilsonsons.com.br.
